## **DETAILED ACTION**

### ***Priority***

1. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

### ***Information Disclosure Statement***

2. The information disclosure statement (IDS) submitted on 11-12-2003 was considered by the examiner.

### ***Drawings***

3. The drawings filed 11-12-2003 have been approved by the examiner.

### ***Claim Rejections - 35 USC § 102***

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claims 1-2, 5-8, 10-11, 16-19, 21, and 25-29 are rejected under 35 U.S.C. 102(b) as being anticipated by Hashizume. The image forming device by Hashizume has a means for removing paper dust, a brush 43, which is positioned as shown in figures 1, 3, and 4. The brush is intermittently driven in the forward or reverse direction (column 6, line 21-51; column 7, line 34- column 8, line 19).

### ***Claim Rejections - 35 USC § 103***

6. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

Art Unit: 2852

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

7. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

8. Claims 9 and 20 are rejected under 35 U.S.C. 103(a) as being unpatentable over Hashizume in view of Hamakawa et al. (JP2002/296998a).

Hashizume does not discuss a flicker. Hamakawa et al. teaches a flicker for a brush. It would have been obvious to one of ordinary skill in the art at the time the invention was made to use the flicker of Hamakawa et al. with the image forming device of Hashizume to remove the collected matter from the brush.

#### ***Prior Art***

9. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Koumura et al. and Shoji et al. teach pertinent prior art.

#### ***Allowable Subject Matter***

10. Claims 3-4, 12-15, and 22-24 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
